About Me

As a person, I'd say I have a pretty hands-on, experimental approach to my work. I'm not afraid to try unconventional combinations of type and image or to push an idea until it feels right. I enjoy collaborating with people who are equally passionate about design and music.

My style is quite influenced by retro aesthetics, synthwave, and sometimes a bit of glitchy, analog-inspired textures, but I'm also interested in exploring minimalist approaches that let the motion speak for itself.
